

RMC @ Marmomac 2019

The biggest stone, design and technology trade fair in Italy

Dear Sir/Madam,

Another edition of Marmomac came to the end. As we couldn't meet each other in Italy this year, we would like to share with you some interesting features from our booth which attracted a lot of attention. We believe that you will appreciate the details and all our thoughts behind it.

We hope to meet you there next year!

In The Spotlight

New Product

RMC has proudly announced the launching of a new colour from the Merrazzo Collection. Based on the clear success of Merrazzo Africa, we have brought to the market its "bigger sister" - **Merrazzo Africa Grande** - with bigger chips and the same colour combination, which already has its fans based on the feedback from this show.

Everybody Looks Through Windows

The window made out of our top seller Merrazzo Africa attracted many people's eyes, getting curious of what could be behind it. Many visitors had to stop there, admiring and touching the perfect finishing of its cut. The strategically lit windows were used as a great spot to take nice photos.

The Whitest Thassos & A Raw Block

The RMC's reception was already, by itself, really inviting since this piece was an interesting combination of the whitest product in our portfolio - Revo Thassos White - and part of a raw block of Imperador - showing the massiveness of our product.

Levitating Wheels

Our creative team designed a coffee table, made out of 7 different products from our collection, that attracted a lot of attention. "Why" would you ask? Well, it appears it's levitating. Visitors tried to understand how this table was fixed.

So, any idea of how they were fixed?

Galleries of Many Products in Different Finishes

Visitors appreciated the possibility to see many products displayed, allowing them to have a wide variety to choose their favourites from. In the front of our booth, on the left side, you could see a both sided gallery, where every piece had different finishing on each side. Entering our booth, on that same left side, on the walls, there was a small "art" gallery where we displayed some pieces of our laboratory developments. There, visitors could let their inspiration flow, while observing what we can do.

Stay in touch

We'd like to hear from you

Follow us on social media to keep up with new material and new projects.

We look forward into cooperating with you. Should you have any questions, please do not hesitate to [contact us directly](#).

RMC is **high-quality engineered marble** which is from the price/quality ratio point of view likely the best material for vanity tops, floors or wall cladding and which has been **produced since 1980 in Portugal**.
